

What Is Claimed Is:

1. An interconnected suspension for a vehicle having right and left control arms, the suspension comprising:
 - 5 a buffer interconnected to the right and left control arms; and
 - a mounting bracket for the buffer, being disposed at tip end portions of the right and left control arms.
- 10 2. The interconnected suspension according to claim 1, wherein the buffer is an elastic member.
- 15 3. The interconnected suspension according to claim 1, wherein a plurality of locking holes is bored on the mounting bracket to be able to adjust the height of the elastic member.
4. The interconnected suspension according to claim 1, wherein the buffer is a shock absorber.
- 20 5. The interconnected suspension according to claim 4, wherein an upper bracket is formed on both ends of the shock absorber, and the upper bracket and the mounting bracket are connected to each other by means of a link.
- 25 6. The interconnected suspension according to claim 4 or claim 5, wherein a plurality of locking holes is bored on the mounting bracket to be able to adjust the height of the shock absorber.
